

TRANSPORTING YOUR PET

Thank you for choosing Tea Tree Gully Veterinary Hospital to assist you with the veterinary requirements regarding the transport of your pet.

Any move with animals & especially overseas can be a stressful time. There are often many steps required to move your animal with you, and preparations should be started as early as possible.

For us to help you more effectively, we ask you take a little time to research the requirements for your pet's travel. We will work with the Department of Agriculture to ensure all required tests and treatments are performed according to the information you provide below regarding your travel.

Please complete this questionnaire and return it to us prior to your appointment. You can also email it back to us at reception@ttgvet.com.au.
